Threaded EN 561 socket

Produktbeschreibung

Quick-fit probe for quickly connecting equipment with the EN 561 probe. The socket has a G3/8" F or G1/4" F thread for connection to equipment. EN 561 series sockets have a safety release ring of a specific color for the gas used (comburent gases, fuel gases and inert gases) with a locking system that prevents accidental release when the socket is coupled. Each socket can only be used with the relevant probe to prevent wrong connections between comburent gases, fuel gases and inert gases.

Normen

UNI EN ISO 9539 | UNI EN 561

Komponenten

CW614N brass body and cut-off.

Anodized aluminum ring.

Spring, set screws and snap ring made of AISI 316 stainless steel.

NBR gasket for all gases, FKM for Oxygen.
