

AFNOR FR socket fixing bracket

Product description

The fixing bracket for AFNOR FR sockets is suitable for bed head panel installation. There are two cuts in the sides where the copper pipes in the bed head connect to the base block. The omega-shaped bracket is made out of satin-finish AISI 316 steel. The distance between the centers of the slots for fixing the bracket to the wall with M5 screws (not supplied) is 55 mm.

Components

Satin-finish AISI 316 steel bracket.
