Cylinder manifold

Product description

Cylinder manifold for a gas distribution system; with two or three places; specific gas inlet and outlet connection; equipped with n. 1 cap for left side inlet; non-return valve incorporated in the inlet connection; complete with stainless steel fixing bracket; made of materials compatible with gases and applicable standards in the food gas sector; it is possible to connect it to another of the same type through the straight connection. The identification takes place through the indication of the name and / or symbol of the supplied gas and of the production batch stamped on the manifold for traceability. The inlet and outlet connections are W21.7x1 / 14 "'A' threaded.

Normatives

Regolamento (CE) n. 1935/2004

Components

Valve bodies, inlet and outlet fittings, and manifold blocks are made of brass.

One galvanized iron mounting bracket.
TInlet and outlet connections are W21.7x1 / 14 "'A' threaded with non return valve.

Maintenance kit
