EN 561 threaded probes

Product description

Male probe with a EN561 standard profile on one side and a G3/8" F threaded connection on the other side, with a right-hand thread for comburent gases and a left-hand thread for fuel gases. Each profile has a different size to prevent wrong connections between comburent and fuel gases.

Normatives

UNI EN ISO 9539 | UNI EN 561

Components

AISI 316 stainless steel gas specific body marked for gas type.

CW614N G3/8" F threaded brass nut with a right-hand thread for comburent gases and a left-hand thread for fuel gases.
