

Medical gas devices

Recessed base kit

Product description

The kit is made of ABS and is used to house recessed AFNOR, UNI, DIN, BS, adapter terminal units, NIST and AGSS. AFNOR and Adapter terminal units must be finished with a colored screen printed finisher panel with the name of the gas used. See file: "Recessed base finisher panel". Each box has dovetail tabs on the side making it easier to install several boxes in line. The cover has been designed to keep the effect of an uneven wall finish to a minimum.

Components

N. One black ABS box with dovetail tabs.

N. One white ABS cover.
