

Medical gas devices

Gas shut-off box

Product description

Shut-off valves box available in two versions: wall mount or recessed. The front panel has transparent windows so you can easily read the pressure and check the status of the valves. The front panel is locked with a triangular socket key and has an emergency press-release system. IN/OUT pipe slots top or bottom. Two models: one for up to 3 gas outlets and one for up to 5 gas outlets. On request, the box can be supplied with a dedicated insulated alarm compartment (alarm kit built into shut-off module). The product is made of scratch resistant white powder-coated galvanized steel.

Normatives

UNI EN ISO 7396-1

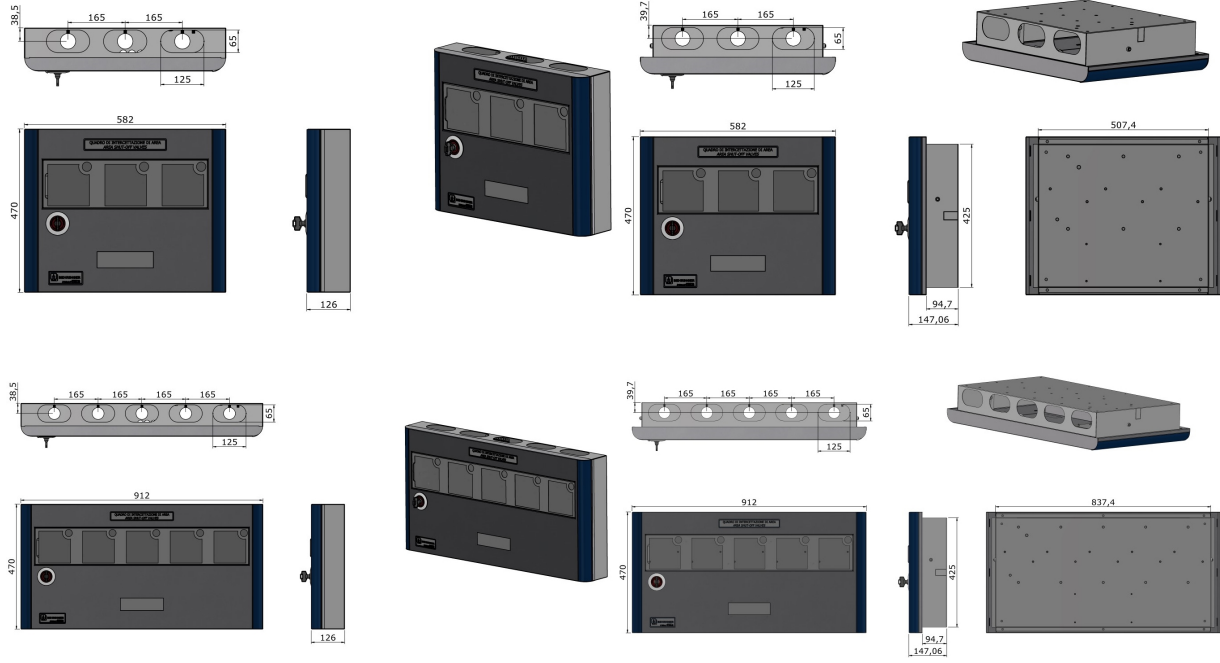

Components

Case and door in galvanized and white powder coated anti-scratch steel.
