BH 130 probes

Product description

BH 130 series male probe with a BH 130 socket compliant profile on one side and a G3/4" F threaded connection on the other side, with a right-hand thread for comburent gases, inert gases and air, and a left-hand thread for fuel gases. The probes have 5 profiles (comburent gases, fuel gas 1, fuel gas 2, inert gases and air) of different sizes to prevent connecting the wrong type of gas.

Components

AISI 316 stainless steel gas specific body marked for gas type.

The G3/4" F threaded connection has a right-handed thread for comburent gases, inert gases and air, and a left-handed thread for fuel gases.

Technical data

CODE	GAS	CONNECTION
P0160	OXYGEN	G3/4" F R
P0161	FUEL 1	G3/4" F L
P0162	FUEL 2	G3/4" F L
P0163	INERTS	G3/4" F R
P0167	AIR	G3/4" F R
P0167M	AIR	G3/4" M R
