BHN40

Product description

Quick-fit couplings for quickly connecting equipment with the relevant probe.

The BHN40 sockets are used for inert gases, they have a quick-release ring of a specific color for the gas used. Each socket can only be used with the relevant probe to prevent wrong connections

Components

Body, ring and cut-off made of CW614N chemically nickel-plated brass.
 Spring, set screws and snap ring made of AISI 316 stainless steel.
 NBR gasket for all gases, FKM for Oxygen.
