

Economizer

Product description

Economizer recommended for welding on a bench when there are frequent interruptions in the work.When the torch is hooked onto the lever of the economizer, this cuts off the gas supply. When you want to start work again all you have to do is lift the torch and light it using the pilot light without having to adjust the flow.The inlet and outlet are both fitted with an Ø 8 mm hose connector.

Technical data

CODE	ITEM
C0094ECO	O2/CO2 economizer
C0095ECO	O2/C3H8 economizer
