Nesplon 400

Product description

The Nesplon 400 safety valve for high flowrate industrial gas lines performs three functions, flame arrestor, gas check and overpressure discharge in compliance with ISO 5175-1 standards.The Nesplon 400 valve comes with two 1" gas specific flanges and counter flanges.We recommend a full service of the Nesplon/400 valves in the case of a flashback, after 5 years from the date of installation and in any case after the time limit of 5 years plus 1 from the manufacturing date on the valve.

Normatives

UNI EN ISO 9539 | UNI EN ISO 5175-1 | UNI 11627

Components

Galvanized steel body.
AISI 316 sintered stainless steel flashback arrestor filter.
CW614N brass gas check and overpressure discharge valve.
Stainless steel springs.
Aluminum and NBR body gaskets.
FASIT 202 counter flange gaskets.

Maintenance kit
